

SEMESTER 1

PTED 71000- Human Anatomy 1 (2)

exploration of gross human anatomy, specifically

therapeutic interventions, students will also refine

alongside refining the documentation of these

PTED 71600- Movement Science 1 (2)

PTED 71100- Human Physiology (3)

inflammation, and the function of integumentary,

PTED 71700- Professional Topics in

PTED 71300- Fundamental Skills in Physical Therapy Practice (2)

and International Classification of Functioning,

their communication skills as a clinician specifically

PTED 71900- Evidence-Informed Practice 1 (2)

synthesis, hypothesis generation, reflective practice,

PTED 71301- Fundamental Skills in Physical

Client Management and the International Classification

SEMESTER 2

PTED 72000- Human Anatomy 2 (2)

exploration of gross human anatomy, specifically on

PTED 72100- Musculoskeletal 1 (2)

This course is the first of a three-course series of

management model, the International Classification

SEMESTER 3

PTED 73000- Pharmacology (2)

PTED 73100- Musculoskeletal 2 (2)

(1)

PTED 74700- Cardiovascular & Pulmonary Physical Therapy (2)

client management and International Classification

PTED 74701- Cardiovascular &

and International Classification of Functioning,

and clinical laboratory data to add

a

o add

**PTED 75500- Medically Complex Patient
Management (2)**

**PTED 76500- Integrated Patient
Management (1)**

examination findings, formulate accurate diagnoses,

SEMESTER 8

PTED 78000- Clinical Education 4 (8)

they have sufficient opportunities to apply the skills

PTED 78900- Doctoral Capstone Project (1)
